**Overview:**  
BlackRock Solutions (BRS) is uniquely positioned to address the industry's risk management, portfolio construction and financial technology demands. The various business departments within BRS are focused on providing clients with highly scalable portfolio analytics & risk management, liability-driven investing & pension solutions, and regulatory advice & balance sheet strategy. BRS offers clients customized solutions powered by Aladdin, BlackRock's proprietary risk management system.  
The Aladdin Wealth team within BRS is bringing the same risk capabilities used by BlackRock's investment teams and sophisticated institutional clients worldwide to the wealth management industry and retail investors, equipping clients with model construction capabilities, risk monitoring tools, and portfolio construction & analytics. Aladdin Wealth partners with clients to help them lead their enterprise risk, building better portfolios, improving their value proposition and institutionalizing their investment process.

**Position Description:**  
**Description :** The Analyst will join the Aladdin Wealth Enterprise team in Mumbai. Analyst will be an integral part of the team and take responsibility for servicing our clients across a range of activities including analytics support, product management, and implementation of Aladdin capabilities.

**Responsibilities:**

1. Work with the global Aladdin Wealth team to help implement new clients on the Aladdin Wealth platform. This includes understanding a client's business requirements and working with them to set up a process that helps generate risk analytics through an overnight process.
2. Lead technology initiatives with in the team helping to grow the Aladdin Wealth product, as well as achieve scalability and efficiency in the team's operations
3. Develop understanding of BlackRock's proprietary risk models and conduct risk reviews on security/portfolio level for client reviews and POCs
4. Develop an understanding of client implementation processes from prospecting to go-live stage and provide regular support and servicing post-implementation

**Skills/ Requirements:**

1. B.E./B.Tech from a top university
2. Understanding of at least one programming language
3. Strong quantitative skills
4. A passion to learn about financial markets and products
