Data Science Intern

Noida

Job Description

Octro Inc. is looking for a Data Scientist who can leverage the power of Deep Learning and Reinforcement Learning to impact user experience in a positive way.

- The ideal candidate should have knowledge and experience of working in deep learning and/or reinforcement learning.

- Should have thorough knowledge of statistics and probability (knowledge of calculus and linear algebra would be a plus).

- Must be a team player and should have ability to work with different teams.

Responsibilities :

- Work with stakeholders throughout the organisation to identify opportunities for leveraging company data to drive business solutions.

- Create Machine Learning models to increase and optimise user experiences, revenue generation, ad targeting and other business outcomes.

- Automate business processes by effectively solving them via AI.

Description :

About Company:

At Octro Inc, we reimagine games that have been played for generations on mobile platforms. We are a technology organization at heart and take pride in the platforms we create.

We are a venture backed startup with a successful track record of developing and launching innovative and creative mobile / social games targeting Indian players.

A game brand that has captivated and continues to engage millions of players (2 Million + daily active users). The technology platform we have created enables awesome gaming experience for users. Our games scale to massive numbers of online users with great performance.

Our games can be played with your friends and compete with virtual currency.

Our games are amongst the ten top apps earning the most revenues on both Android and Apple's iOS store in India.
