

**Company :**  
**Company Name :**  
**Nature Of Business :**  
**Designation :**

**Fullerton India Credit Company Ltd**  
**Fullerton India Credit Company Ltd**

**Financial Institution - NBFC**

**Intern**

**Tentative Job Location :**

Mumbai, Maharashtra

We would be on-boarding interns in the Analytics teams. The intern will work on one of the many projects –

**Project brief :**

**(Assignment of project will be at the discretion of the guide & functional head)**

Finding Information Value from Raw Transactions Data (Financial institution's get raw dump of transactions from Bank accounts of potential borrowers at the time of loan applications.)

This project will deal with collecting this data at one place, merge this data with loan performance data, create meaningful attributes from this data and make recommendations about usages of this data in three specific areas:

1. Usage and value of raw transaction data in credit scoring
2. Usages of this data in creating income expense profile
3. In creating fraud alerts for the profile

Impact of pandemic on customer's income and repayment capabilities

This project will deal with creating a framework for analysis of pandemic impact on income and repayment capabilities in medium term for existing customers. We expect to see these customers divided into different logical segments and suggest the best way to deal with these customers for a win-win strategy, benefiting both customer and financial institution.

**Description :**

Collection strategy for stressed customers

In this project, the intern(s) has to work on set of customers in higher collection buckets, look at money collection rates in longer windows, run some segmentation/ prediction models and come up with an alternate strategy for higher collectability from these customers

Opportunities and threats analysis for lending businesses during pandemic

The intern(s) to work with huge amount of public data available from sources like RBI, SIAM, Bureaus and other industry data to identify segments of new opportunities for lending business and also segments highly impacted by pandemic to avoid in short to medium term

Study of data governance frameworks for managing enterprise data

This project intern(s) is expected to study the best practices of data governance framework. Look at the existing data governance model of the enterprise and come up with recommendations to address
